MAB 100

Magnetic core drilling machine – the compact design and low weight make it particularly suited for mobile applications and tight mounting situations.

Power and Service Life

850 W motor and single-gear transmission for the high power requirements of magnetic core drilling.

- ▶ High power output
- ▶ Safe, reliable function

Specification:

Power:	800 Watt
Overheating protection:	—
Torque control:	—
Full wave control electronics:	—
CW/CCW operation:	—
Morse taper:	Direct arbor
Magnet indicator:	—
Stroke:	80 mm
Magnet size:	80 x 160 x 41.5 mm
Weight:	9.9 kg

Version 230 V

Version 110 V

Optimum protection

Integrated cutting oil reservoir.
Complete cabling in the housing.

High safety

Confusion-free, correct ergonomic arrangement of switches for power and magnetic force.

Correct oil dosage

Automatic internal lubrication right to the tip of the core drill.
