

PANTHER

F U M E E X T R A C T O R

1. The aerospace turbine fan is designed to provide high output air flow.
2. Compact size, lightweight, double walled construction with carrying handles enables easy portability.
3. Ventilates fumes and gases.
4. Corrosion-proof, anti-impact heavy duty reinforced housing.
5. Suitable for working in ship yards, steel construction and welding applications.

Motor: Single phase 1/3hp

Noise: 76dB

Dimensions: 14"H x 12"W x 34"L

Expanded length: 4.6m including canister

Fan Diameter: 203mm, 9 blade

Air flow: Basic unit with 4.6m duct at 0 deg 788cfm
Basic unit with 4.6m duct at 90 deg 670cfm
